

Annex C to Appendix A

Estimate of Material and Supplies now in Possession of Yugoslav Air Force

I. Aircraft (Unit Equipment)

Light Bomber	96	Soviet
Attack	96	Soviet
Fighter	136	Soviet - German
Transport	20	Soviet - German

II. Material and Supplies

- a. P. O. L. - The Yugoslav Air Force has a stock pile of Avgas and lubricants of undetermined size. YAF is accumulating Avgas at the rate of approximately 900,000 gallons each 3 months.
- b. Aircraft Spares and Equipment - There is no definite information available as to the status of YAF aircraft spares and essential flight maintenance equipment. It is assumed however that an adequate supply level exists for the deployment of the YAF at 70% unit strength for the initial phase of any combat operation D - D / 30.
- c. Aircrew Personnel - Yugoslav aircrew personnel are available to adequately man existing YAF combat units. It is estimated that YAF aircrew training will not support combat attrition requirements beyond D / 180.
- d. Aircraft Ammunition - the extent of aircraft ammunition (7.6-mm, 12.7-mm, and 37-mm) stocks is unknown but believed to be in short supply.

~~CONFIDENTIAL~~
